

CyberGuard AI Threat Analysis Report

■ Threat Level: HIGH

■ Phishing Probability: 90%

■ Suspicious Indicators:

- The email creates a sense of urgency to prompt the user into taking action
- The email asks the user to click on a link to verify their account, which may lead to a phishing website
- The sender's email address does not match the official email address of the bank

■ Potential Risks:

- Financial loss due to unauthorized transactions
- Compromise of sensitive personal and financial information

■ Security Recommendations:

- Verify the authenticity of the email by contacting the bank directly through an official phone number or website
- Avoid clicking on suspicious links and instead, type the official bank website URL directly into the browser
- Use two-factor authentication and monitor account activity regularly to detect any suspicious transactions
